DISTINGUISHED LECTURE SERIES – Fall 2011

OCT 6

3:00 – 4:00 pm

Biosciences 587

“Internet privacy: It is not getting better”

- Speaker: Dr. Balachander Krishnamurthy

Balachander Krishnamurthy – AT&T Labs - Research

- Internet privacy has become a hot topic recently with both the advent of Online Social Networks and a significant amount of publicity related to privacy. For the last few years we have been examining the leakage of privacy on the Internet: how information related to individual users is aggregated as they browse seemingly unrelated Web sites. Our results show increasing aggregation of user-related data by a steadily decreasing number of entities. I will present results from studies on leakage of personally identifiable information (PII) via Online Social Networks (both traditional and mobile OSNs) and popular non-OSN sites. I will also present the current status of both technical and non-technical attempts to ameliorate the problem.

Refreshments available following the lecture

LOCATION: Biological Sciences Building, Room 587

5 minutes walk from LRT station to the BioScience Building, Rm 587

507 Campus Drive, University of Calgary

Parking available in lots 10, 11, and the Art Parkade

See map at: <http://www.ucalgary.ca/map/index.html>
